Projects

Blog CMS – [Live Site](#) | [GitHub](#)

Technologies: Next.js, Tailwind CSS, NextAuth, REST API, MongoDB (Mongoose), Vercel

- Built a fully functional CMS allowing users to register/login and create, edit, delete posts with protected routes.
- Implemented authentication and session management using NextAuth credentials.
- Integrated MongoDB database with Mongoose schemas to manage users and posts.
- Deployed project on Vercel, handling environment variables and production settings.
- Applied responsive design principles and optimized client-server component structure.
- Solved key challenges in API error handling, authentication, and database operations.

Work Experience

Deliveroo – Supervisor | London, UK | 2023–now

- Managed a team of 4 staff across 7 kitchens, coordinating daily operations and workflow.
- Trained and onboarded new team members, ensuring smooth service delivery.
- Monitored performance and resolved operational and customer issues efficiently.
- Implemented process improvements to optimize team performance and task scheduling.
- Developed strong communication, problem-solving, and leadership skills transferable to software development.

Coople - Various Roles | London, UK | 2018–2023

- Completed multiple short-term positions, developing adaptability and reliability.

Education

University of Greenwich – Foundation Degree in Computing, 2023
